

Food Security

7 out of 10 Somalis exist on **less than \$2 per day**

Over 4.1 million Somalis are facing crisis-level or worse acute food insecurity

Woman & Children with Low Iron Levels

Children with Vitamin A Deficiency

Children with Chronic Malnutrition

More than **1.4 million children**, nearly half of the country's under-five population, are projected to be **acutely malnourished** by the end of 2022, with nearly **329,500 severely malnourished**

WHAT CAN WE DO?

Simple solutions can help Somali communities become self-sufficient and work towards ending hunger over the long-term

Life-saving Interventions

Food Distribution

Food support provides immediate hunger relief, combats malnutrition and helps save lives

Long-term Food Solutions

Access to Clean Water

Somalia has water, we just need to help people access it. Infrastructure development for boreholes and water harvesting provides water for crop irrigation and increases drought resilience

Supporting Smallholder Farmers

Increasing the production capacity and harvest yield of smallholder farmers both feeds and employs Somalis. We support farmers through the provision of fertilizers and improved seed varieties

Farmer Education

We provide training to help farmers improve the quantity, quality and value of what they produce

Livestock Support

Livestock support is vital to protect the milk supply and strengthen household and food security. We provide feed, vaccination/treatment, and water to support livestock health and production.
